Credit Name: CSE 2110 Procedural Programming 1

Assignment Name: DigitDisplay

Error Log Entry

What error message did you encounter (if any)?

"string cannot be resolved to a type"

What unexpected behavior did your program exhibit?

my program was spitting out the wrong numbers

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

i put /10 instead of %10

Include a screenshot of specific lines of code.

```
while (num > 0) {
        System.out.println(num / 10);
        num = num / 10;
```

How did you fix the issue?

I put the remainder symbol instead of the division symbol

Provide the corrected code or solution using a screenshot.

```
while (num > 0) {
        System.out.println(num % 10);
        num = num / 10;
    }
```
