Credit Name: CSE 2110 Procedural Programming 1
Assignment Name: DigitSum

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem
How did you approach understanding the challenge?
Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?
I was confused how i could add all the numbers because they were created in a loop
Planning the Solution
Did you create a plan or break the problem into smaller steps before coding?
How did you decide on the tools, data structures, or algorithms to use?
I first saw the relation between this and my last exercise so i used it for the base
Implementation
Did you write the code in small pieces or attempt the entire solution at once?
How did you test your solution along the way to make sure it was working?
I first named the new parts I had to use and then solved from there
Overcoming Challenges
What part of the problem was the most difficult for you?
How did you handle moments when you felt stuck or unsure of what to do next?
figuring out how to add the numbers to a variable
Learning
Was there anything you learned that you think will help you with future challenges?
