Credit Name: CSE 2110 Procedural Programming 1

Assignment Name: House

Error Log Entry

What error message did you encounter (if any)?

This method must return a result of type int

What unexpected behavior did your program exhibit?

it was printing the wrong output as the layout of the house was all mixed up

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

I had to call the right methods in the right order, because it was printing the base on the roof or the walk on the base

Include a screenshot of specific lines of code.

```
if (choice == 1) {
    addRoof();
}
else if (choice == 2) {
    addBase();
}
else if (choice == 3) {
    addWalk();
}
else if (choice == 4) {
    addRoof();
    addWalk();
}
else if (choice == 5) {
    addBase();
    addRoof();
}
else if (choice == 6) {
    addWalk();
    addBase();
}
else if (choice == 7) {
    addWalk();
    addBase();
    addRoof();
```

Provide the corrected code or solution using a screenshot.

```
if (choice == 1) {
    addRoof();
}
else if (choice == 2) {
    addBase();
}
else if (choice == 3) {
    addWalk();
}
else if (choice == 4) {
    addRoof();
    addWalk();
}
else if (choice == 5) {
    addRoof();
    addBase();
}
else if (choice == 6) {
    addBase();
    addWalk();
}
else if (choice == 7) {
    addRoof();
    addBase();
    addWalk();
```
