

Credit Name:CSE 2140 2nd Language Programming

Assignment Name: Change

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge?

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?

I wonderd how to find out the remaining and then divide it again so i looked it up

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding?

How did you decide on the tools, data structures, or algorithms to use?

I decided to do all of the coding for quarters then dimes then so on

Implementation

Did you write the code in small pieces or attempt the entire solution at once?

How did you test your solution along the way to make sure it was working?

I did it in small peices by doing each coin one by one

Overcoming Challenges

What part of the problem was the most difficult for you?

How did you handle moments when you felt stuck or unsure of what to do next?

how to get the remainder then turn it into the new coins number, I decided to look up my exact problem through chatgpt

Learning

Was there anything you learned that you think will help you with future challenges?

how to get the remainder then turn it into the new coins number.
