

Credit Name:CSE 2140 2nd Language Programming

Assignment Name: digits2

Error Log Entry

What error message did you encounter (if any)?

none

What unexpected behavior did your program exhibit?

it showed 2 numbers for my tens digit

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

math problem

Include a screenshot of specific lines of code.

```
int hundreds = (number / 10) / 10;  
int ones = number % 10;  
int tens = number % 100;
```

How did you fix the issue?

ask marcus for help

Provide the corrected code or solution using a screenshot.

```
int hundreds = (number / 10) / 10;  
    int ones = number % 10;  
    int tens = (number % 100 - ones) / 10;
```
