

Credit Name:CSE 2140 2nd Language Programming

Assignment Name: Grade

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge?

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?

Didn't know what type my variable was, so I asked marcus

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding?

How did you decide on the tools, data structures, or algorithms to use?

I copied and pasted the code from my Printing project then changed everything that needed to be changed

Implementation

Did you write the code in small pieces or attempt the entire solution at once?

How did you test your solution along the way to make sure it was working?

I did the whole project at once as it was pretty easy since I practiced making if statements in the past skillbuilders

Overcoming Challenges

What part of the problem was the most difficult for you?

How did you handle moments when you felt stuck or unsure of what to do next?

finding out the types for my variables, I asked Marcus for help and he told me what types to use

Learning

Was there anything you learned that you think will help you with future challenges?

Strings
