

Credit Name:CSE 2140 2nd Language Programming

Assignment Name:printing

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge?

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?

I came across the problem carefully, and related it to my skillbuilders, then with the help of my skillbuilders I understood how i was gonna takle the problem

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding?

How did you decide on the tools, data structures, or algorithms to use?

I looked back on my skillbuilders and used them to solve the problem

Implementation

Did you write the code in small pieces or attempt the entire solution at once?

How did you test your solution along the way to make sure it was working?

I attempted the entire soulution at once as my skillbuiilders gave me alot of confidence to do so

Overcoming Challenges

What part of the problem was the most difficult for you?

How did you handle moments when you felt stuck or unsure of what to do next?

Planning the Solution as I wasn't sure on how to solve the problem but then I just looked back at my skillbuildersw and relized it wasn't that hard

Learning

Was there anything you learned that you think will help you with future challenges?

skillbuilders help alot
