

Credit Name: CSE 2140 2nd Language Programming

Assignment Name: Digits

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge?

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?

I couldn't figure out how to get the tens place with a 3 digit number, I resolved it by asking marcus

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding?

How did you decide on the tools, data structures, or algorithms to use?

I copy and pasted my other digits assignment so I could get a head start

Implementation

Did you write the code in small pieces or attempt the entire solution at once?

How did you test your solution along the way to make sure it was working?

I just went straight to figuring out how to find the tens digit

Overcoming Challenges

What part of the problem was the most difficult for you?

How did you handle moments when you felt stuck or unsure of what to do next?

finding the tens digit was the hardest and I figured it out by asking Marcus

Learning

Was there anything you learned that you think will help you with future challenges?

computer science is just math
